About ISTE

The Indian Society for Technical Education (ISTE) is a leading national professional non-profit making society for the technical education system in India with the motto of career development of teachers and personality development of students and overall development of our technical educating system. The major objective of the ISTE is to provide quality training programs to teachers and administrators and to assist and contribute in the production and development of top-quality professional engineers and technicians needed by the industry and other organizations. NEP 2020 is the first Education policy of 21st century and builton the fundamental pillars of Access. Equity, Quality, Affordability and Accountability. It outlines the vision of India's New Education system as a comprehensive framework for elementary education to Higher Education. It emphasizes the importance of applied learning, multiple pathways to learning and resources sharing. The vision of NEP 2020 has the potential to ensure that India turns out the students of higher quality, equipped to take up professions and start a business almost as soon as they graduate.

About FDP

NEP 2020 promotes a participatory experiential approach learning approach to education and is a progressive shift to a more scientific approach in education. The new educational structure caters to the child's cognitive development and provides them with social and physical awareness. It is primarily based on multidisciplinary of education through which every child will be allowed to do what he loves to do as an important step towards nation building. It offers a more flexible study route. Letting students pick and choose their academic journey rather than conforming to the set standards and norms. With the multiple entry and exit potions and a 4 year degree option, students would be able to move towards a more research based learning. It recommends that the Stand-alone institutions into multidisciplinary colleges and universities by establishing 4 year integrated Teacher Education programme with exit option. The evaluation and assessment have also been transformed, which will eliminate examination phobia from the students. NEP 2020 focuses on the Integration of technology in both school education and higher education. It recommends that vocational education will be integrated to school and higher education in a phased manner. The NEP 2020 can make India one of the world's leading countries help children and youth achieve their potential, and eventually contribute to building an Atmanirbhar India.

Objectives of FDP

The objectives of the seminar are to offer a platform for academicians, NGO's and policy makers for discussion and exchange of ideas on NEP 2020.

- To discuss the vision of NEP 2020.
- To understand the structure as proposed in NEP 2020.
- To discuss the challenges ahead in effective implementation of NEP at all levels of Education.
- To understand the concept of multidisciplinary and holistic education.

Resource Persons

Professors from IITs, NITs and other reputed Universities along with Experts from Industry will deliver the lectures and share Hands on Experience.
