

LAB SCHEDULE

Name of the dept. : ECE **class** : I-II, ECE-B
Lab name : E.CHEM LAB **year** : 2017-18

LIST OF EXPERIMENTS

1. Determination of Dissolved Oxygen present in the given water sample by Modern Winkler's Method.
2. Determination of Kinematic Viscosity of a given oil sample by using Viscometer.
3. Determination of acid number of given lubricating oil.
4. Determination of Strength of a strong acid by pH metric Method.
5. Conductometric determination of Strength of an Acid using strong base.
6. Conductometric determination of mixture of acids using strong base.
7. Determination of Total Hardness of water sample by using EDTA Method.
8. Colorimetric determination of Iron (III).
9. Potentiometric determination of Mohr's salt using $K_2Cr_2O_7$.
10. Determination of manganese dioxide in manganese ore (pyrolusite).
