

# LESSON PLAN

Period	Date Periodical	Topic	Unit No.	Teaching Methodology	Remarks	Corrective Action Upon Review
1	17/10	unit 1 Introduction	1	CA		
2	17/10	Review of compiler structure	1	CA		
3	17/10	Advanced ideas in compiling (part 1)	1	PPT		
4	18/10	Importance of code optimization	1	PPT		
5	18/10	Structure of optimising compiler	1	PPT		
6	19/10	Placement of optimiser in optimising optimising compiler	1	PPT	Q&A	
7	20/10	unit 2 Compiler Internal Structure - Data and Address formats - Intermediate representation (IR) - Syntax to describe intermediate language with their relationships (syntax directed)	2	CA		
8	21/10	Medium level intermediate language (MLI)	2	CA		
9	21/10	Low level intermediate language (LLI)	2	CA		
10	21/10	Machine level intermediate language (MLI)	2	PPT		
11	21/10	Other intermediate languages: Machine and LLI	2	PPT		
12	22/10	Representing Pseudocode LLI and C/C++	2	PPT		
13	22/10	Fully reading of data structures	2	PPT		
14	22/10	numbers: Int, floating-point intermediate code	2	PPT		
15	23/10	other intermediate language forms	2	PPT		
16	23/10	function capture: data representation and code	2	PPT		

# LESSON PLAN

Period	Date Period	Topic	Unit No.	Teaching Methodology	Remarks	Unsettled Items Upon Review
5	9/11	grammatical patterns discipline	2	PPT		
6	9/12	phonetic techniques children's language development	2	PPT		
5	9/13	code switching and foreign independent code	2	PPT		
6	9/14	dialectic and foreign - the language effect	2	PPT	BIV	
1	9/15	Level 3 Central place analysis Multi place analysis	3	PPT		
1	9/16	Central place analysis Opposition & Central place analysis	3	PPT		
1	9/17	multi, first, third, 1st order hierarchy	3	CA		
5	9/18	Anticentre hierarchy, (opposite, not research) downward	3	CA		
5	9/19	Upward, strongly connected conformity, hierarchy	3	PPT		
5	9/20	Opposite analysis; Central place, downward analysis	3	PPT		
5	9/21	Multi place analysis - stacking hierarchy, low connectivity	3	PPT		
1	9/22	Upward, lower function and fixed points	3	PPT		
1	9/23	Upward of one place analysis, structural analysis	3	PPT		
5	9/24	Individual analysis, other approaches, no change, no change analysis and single opposition case, poor stacking case analysis	3	PPT		
5	9/25	Orientation and rotation	3	PPT	BIV	

# LESSON PLAN

Number	Date Duration	Type	Unit No.	Teaching Activities	Remarks	Correction Notes Used Slides
1	10/10/2018 10:00 - 11:30	Topic 1: dependency analysis and optimization	1	CA		
2	11/10/2018 10:00 - 11:30	Topic 2: dependency and dependency graphs, dependency relations	2	CA		
3	12/10/2018 10:00 - 11:30	Topic 3: local dependencies, data dependencies in loops	3	PPT		
4	13/10/2018 10:00 - 11:30	Topic 4: identifying lifting programs, dependency graphs	4	PPT		
5	14/10/2018 10:00 - 11:30	Topic 5: Substitution, SI optimization, flow sensitivity and flow invariant information	5	PPT		
6	15/10/2018 10:00 - 11:30	Topic 6: strength reduction, local optimization, static splitting, SI splitting	6	PPT		
7	16/10/2018 10:00 - 11:30	Topic 7: static optimization, strength reduction methods	7	PPT		
8	17/10/2018 10:00 - 11:30	Topic 8: pointer refinement and dependency, algorithmic, compiler-based optimization techniques	8	PPT		
9	18/10/2018 10:00 - 11:30	Topic 9: Visual programming, OOP, prototyping	9	PPT		
10	19/10/2018 10:00 - 11:30	Topic 10: Generic functions, constant propagation	10	PPT	HW	
11	22/10/2018 10:00 - 11:30	Topic 11: Local-SI strength reduction & pointer flow analysis, local optimization	11	CA		
12	23/10/2018 10:00 - 11:30	Topic 12: Power, regular abstraction, LCM, improved, LCM, methods, graph coloring	12	CA		
13	24/10/2018 10:00 - 11:30	Topic 13: Priority, local, global coloring, other optimization techniques, elimination	13	PPT		
14	25/10/2018 10:00 - 11:30	Topic 14: Compiler Optimizations - Code Elimination	14	PPT		
15	26/10/2018 10:00 - 11:30	Topic 15: Dead loop elimination, loop simplification	15	PPT		
16	29/10/2018 10:00 - 11:30	Topic 16: Loop unrolling, unrolling bounds optimization	16	PPT		
17	30/10/2018 10:00 - 11:30	Topic 17: dead code elimination, loop with branches	17	PPT	HW	

# LESSON PLAN

Period	Date Duration	Topic	Unit No.	Teaching Methodology	Remarks	Corrective Action Date Review
5	10/11/2023 10:00 AM - 11:30 AM	Unit 1: Procedural/ Sub-procedural analysis, Code optimization	1	CA		
6	10/11/2023 10:00 AM - 11:30 AM	Unit 2: Code optimization and code generation: Instruction distribution	2	CA		
7	10/11/2023 10:00 AM - 11:30 AM	Procedure integration and code generation	3	CA		
8	10/11/2023 10:00 AM - 11:30 AM	loop update optimization check skipping	4	CA		
9	10/11/2023 10:00 AM - 11:30 AM	Multi-procedural CFG, live code graph	5	PPT		
10	10/11/2023 10:00 AM - 11:30 AM	Multi-procedural data flow analysis	6	PPT	<b>HW</b>	
11	10/11/2023 10:00 AM - 11:30 AM	Multi-procedural cost and propagation	7	PPT		
12	10/11/2023 10:00 AM - 11:30 AM	Multi-procedural clean analysis	8	PPT		
13	10/11/2023 10:00 AM - 11:30 AM	Multi-procedural optimization	9	PPT		
14	10/11/2023 10:00 AM - 11:30 AM	Multi-procedural register allocation	10	PPT		
15	10/11/2023 10:00 AM - 11:30 AM	Procedure merging	11	PPT		
16	10/11/2023 10:00 AM - 11:30 AM	Conditional loop merging	12	PPT		
17	10/11/2023 10:00 AM - 11:30 AM	Unit 3: Sub-procedural optimization	13	PPT		
18	10/11/2023 10:00 AM - 11:30 AM	Unit 4: Transformational optimization	14	PPT	<b>HW</b>
